

NBE Therapeutics AG, a rapidly growing Basel-based biotechnology company, is committed to the development of next generation antibody drug conjugates for the treatment of cancer. We are looking for a highly motivated:

Practitioner veterinarian and Animal Welfare Officer 20-40% (m/f)

Job Description

The Animal Welfare Officer will work in close contact with NBE therapeutics' *in vivo* Team. In his/her role, NBE therapeutics' AWO will provide advice to the Study Director and support to Experimenters on matters regarding the planning and execution of *in vivo* research.

Key Responsibilities as Practitioner Veterinarian:

- provide guidance regarding surgical techniques, selection of pharmacologic agents, perioperative care and/or training of other individuals in the program.
- ensure health and well-being of the animals used for research according to best laboratory animal practices, supervise health monitoring and guide diagnosis, treatment and control of disease
- participate in the training of staff; providing expert guidance to the occupational health and safety program (e.g., about zoonotic diseases, animal allergens and other conditions); monitoring and advising on hygiene standards; providing guidance on animal facility design and maintenance.

Key Responsibilities as Animal Welfare Officer:

- provide technological, administrative support and content review for experimental permit applications / renewal and annual reports
- support researchers to establish score sheets and define termination criteria (humane endpoints), help finding measures to reduce the stress and constraint of animals as well as to help finding ways to reduce the animal numbers needed or to replace animal experiments
- be the contact person for the Cantonal Veterinary Office and the Cantonal Commission for Animal Experiments

Qualifications / Experience / Personal Qualities

- Degree (or equivalent) in veterinary medicine
- Minimum 5 years of experience in animal research
- Knowledge of animal experimentation and related Swiss regulations
- Knowledge of cantonal regulatory policies and procedures
- Highly organized, detail-oriented, problem solving personality
- Good written, verbal communications, interpersonal and stress management skills
- Self-motivated, team oriented working style
- Fluency in oral and written English and German

We offer

- Highly competitive conditions in a dynamic and international team
- A comprehensive position with great scientific and intellectual stimulation
